

TEAM CHIMERA

ABOUT US

TEAM CHIMERA

Team **Chimera** is a Student Design Team involved in the design and development of formula style **Hybrid race cars**. The developed prototypes participate in the Formula SAE series of competitions held world over.

We are based of **R V College of Engineering**, one of the best Engineering institutes in the country and hailed as the best private institute in the state of Karnataka.

Started in the year **2006**, the team was initially involved purely in research and development of the hybrid automotive technology.

In the years that followed, the team did some revolutionary research work and brought out some amazing products.

The year 2013 saw the team foray into the **Formula SAE** series of competitions. We've so far participated in Formula Hybrid 2014 and Formula Electric - Italy 2015.

ACHIEVEMENTS

FORMULA -HYBRID,USA-2014

We participated in the International Competition organised by Thayer School of Engineering, University of Dartmouth in New Hampshire, USA-2014 season. We are the first Hybrid Racing Team from Asia to participate in this event. We secured 9th position overall from among the 32 participating universities around the world. And bagged Fan Favourite Award.

ACHIEVEMENTS

FSAE-ELECTRIC, ITALY-2015

We participated in the Electric category of FSAE Italy this year. Our team secured the 6th position in the Cost event and 11th position in the Business presentation. Car was equipped by advanced suspension which had variable ground clearance.

India's First Hybrid Car

We have improved the range, power and speed of REVA Electric Vehicle, by converting it into a hybrid vehicle.

Mr. Pickhard Friedhelm, Bosch along with Mr. Mohandas Pai, Infosys and Mr. Chetan Maini, REVA were seen sharing the dais during inauguration.

We eventually participated in the Michelin challenge

Hybrid Auto rickshaw: 2009

A project which gained a lot of media attention, we created a system which produced hydrogen from water and supplied it to the fuel. The system was mainly designed for autos.

College students build Reva hybrid prototype

THE BUREAU
MUMBAI

A group of students from the Mumbai Institute of Technology (MIT) have developed a prototype of a hybrid electric vehicle (HEV) that can run on both petrol and electricity. The car, which is a two-seater, is powered by a 1.8-litre petrol engine and a 15-kw electric motor. The car is designed to run on petrol for long distances and switch to electricity for short distances. The car is also equipped with a regenerative braking system that can store energy during braking and use it to power the car. The car is expected to be ready for testing by the end of the year.

Plug-in hybrid car unveiled

BANGALORE, 19th July - A group of students from the MIT have developed a prototype of a plug-in hybrid electric vehicle (PHEV) that can run on both petrol and electricity. The car, which is a two-seater, is powered by a 1.8-litre petrol engine and a 15-kw electric motor. The car is designed to run on petrol for long distances and switch to electricity for short distances. The car is also equipped with a regenerative braking system that can store energy during braking and use it to power the car. The car is expected to be ready for testing by the end of the year.

Team Chimera has bagged the **ROOKIE AWARD-BEST DEBUTANT TEAM** in the EV category and we stood 6th overall in the Electric Division of Student Formula Japan - 2016 (SFJ-2016).

WHY SPONSOR US??

Formula SAE is backed by automotive giants like Fiat Chrysler Automobiles, Ford motors, General Motors, Toyota and companies like LG Chem, Eaton, Bosch.

Fundamentally, sponsors are the ones who are majorly responsible for the successful completion of any such project. Your kind support is needed for us to push our potential, work hard and make this project a reality.

The event generates a lot of media attention, brings together industry leaders and thus presents a lot of scope for sponsors to forge corporate relationships with other companies.

Opportunity to closely interact with students from multi-disciplinary background and better identify the talent for recruitment into your company. Your company name and logo will be displayed on the car, team's facebook page, website, twitter handle and on our apparel.
